

# Docket

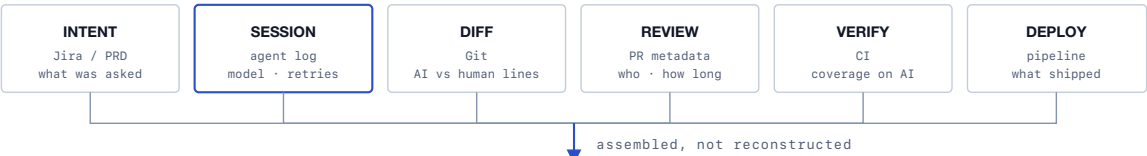

CAB, tuned for the agent development lifecycle

The diff stopped being the change

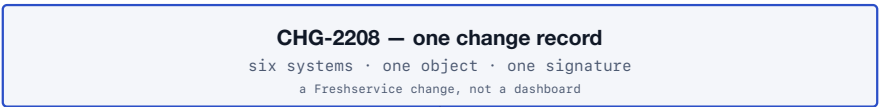

## TRIGGERS

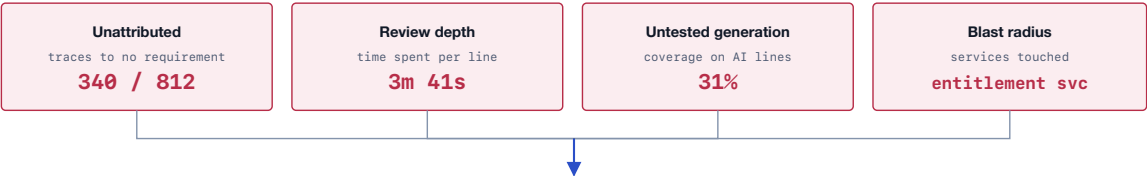

## HOOKS – collected from six systems

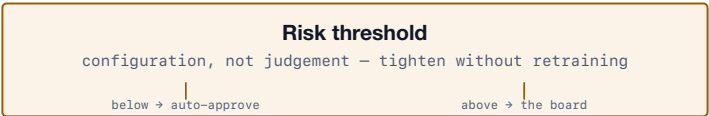

## THE RECORD

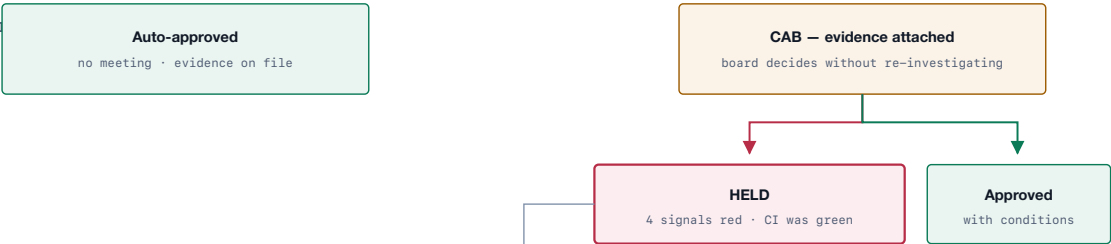

## RISK ENGINE – computed, not declared

## GATE

## DECISION

## ROLLBACK OBJECT

6 hooks · 1 record · 4 computed signals · gate outside the board's judgement · rollback is an agent version, not a commit

Dashed red = changes that produce no record in any ITSM tool today
